Installation (Cloud)

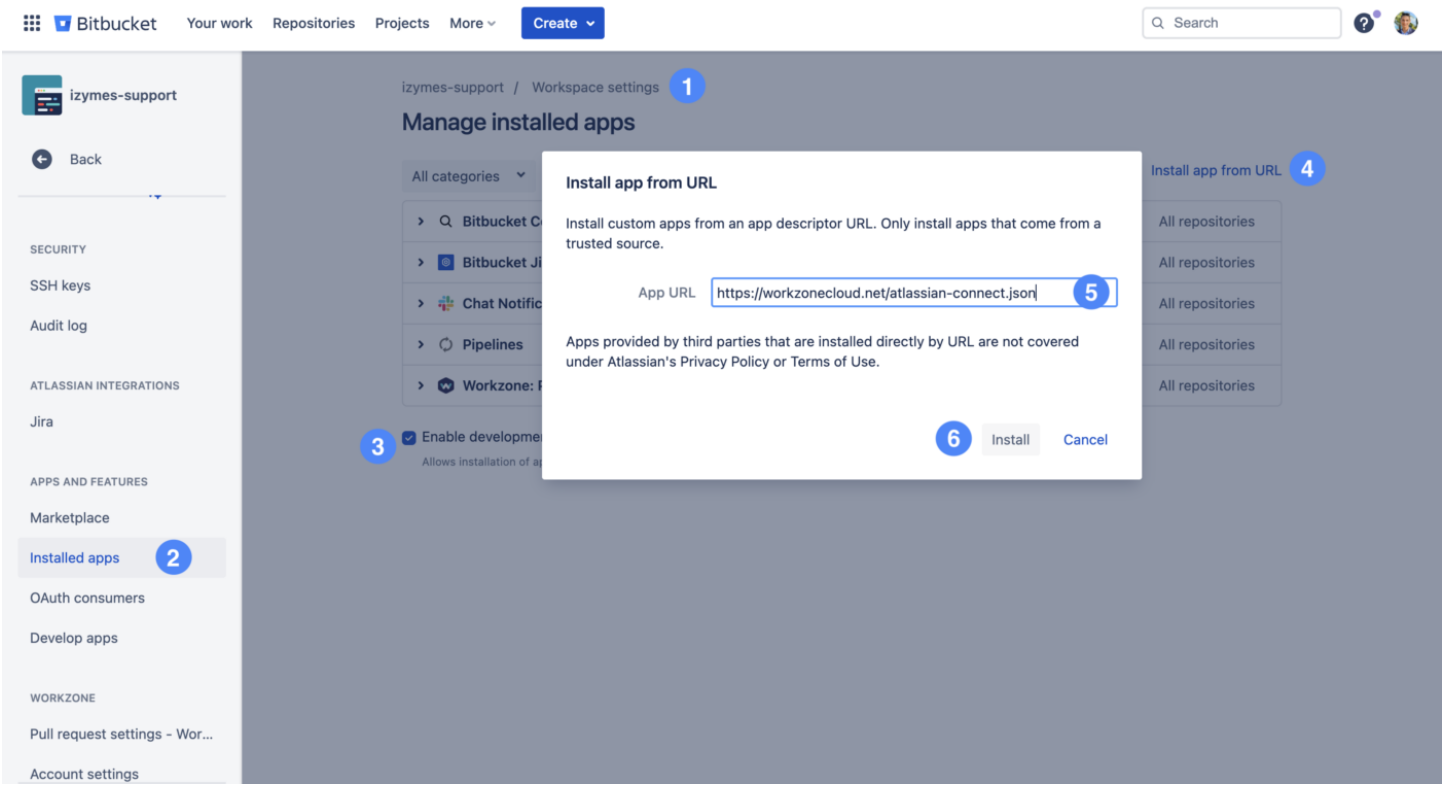

Getting Started (cloud) · https://izymes.com/docs/installation-cloud/

Via Bitbucket Marketplace (recommended)

1. Log into your Bitbucket workspace as an admin.
2. Go to workspace settings and click **Marketplace** in the **Apps and Features** section on the left side menu.
3. To locate the Workzone app in the long list of apps, click on **Categories** dropdown and select **Workflow.**
4. Find **Workzone: PullRequest Workflow** in the list and click on the app tile.
5. Click **Add** to start installing the Workzone app.
6. Workzone will request app access permissions. Click **Grant access**.
7. Refresh the page to load Workzone menu items.
8. You're all set!

Via direct link

1. Log in as an admin and navigate to your **Workspace Settings.**
2. Scroll down the side menu and click on "**Installed Apps**".
3. Enable **"Development Mode".**
4. Click **"Install app from URL".**
5. Copy and past this link into the APP URL space: https://workzonecloud.net/atlassian-connect.json
6. Click **"Install".**
7. Workzone will request app access permissions. Click **Grant access**.
8. Refresh the page to load Workzone menu items.
9. You're all set!

Via Atlassian Marketplace

Follow the link to the Workzone for Bitbucket cloud listing on the Atlassian Marketplace ↗.

1. On the Atlassian Marketplace page for Workzone (Cloud) click on **Try it free.**
2. You are forwarded to bitbucket.org
3. Select the workspace that you want to install Workzone into.
4. Grant Workzone app access.
5. You are all set!

Now it is time to set up Workzone for Cloud! When you are ready, continue on with Getting Started.

Try Workzone for Cloud!
