Navigating Workzone Cloud

Getting Started (cloud) · https://izymes.com/docs/navigating-workzone-cloud/

Workzone Repository & Project Settings

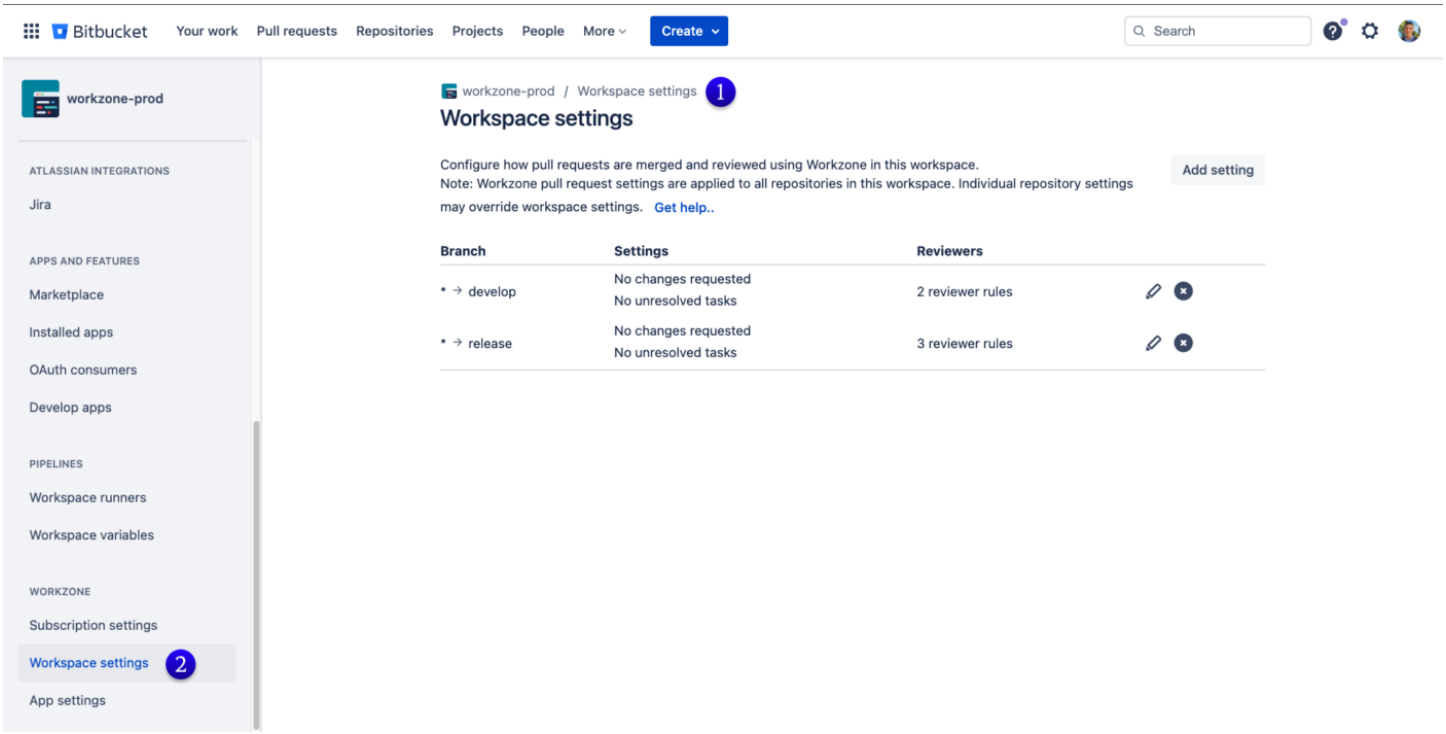

Bitbucket Cloud does not offer us the ability to include the **Workzone** Project Level settings within the **Bitbucket** Project Settings screen. As a workaround, you will still have the ability to manage the Workzone Project Level settings, however, it will be accessed from the Repository Settings screen as seen in the screenshot above.

1. Navigate to your Repository settings
2. Scroll down to "Workzone" and click on "Repository settings" for the Repository settings and,
3. Click on "Project Settings" for the project-level settings.

Note: The Workzone project settings will only be visible to Workspace level admins. The projects settings can't be accessed by repository level admins.

Workzone Workspace Settings

1. Navigate to your Workspace settings.
2. Scroll down the left menu to the "Workzone" title and click on "Workspace settings".

Try Workzone for Cloud!
