Overview

Feature Guide Reminders · https://izymes.com/docs/reminders-overview/

Reminders for Bitbucket allow you to keep your Bitbucket Pull Request workflow process timely and sharp. Define an expiration period for open Pull Requests and remind stragglers automatically to catch up with their overdue reviews and approvals. Reminders for Bitbucket will also inform other stake-holders like team-leads and managers on overdue Pull Request. Stop losing track of Pull Requests and avoid letting them go stale by keeping on top of your organzation’s SCM workflow process.
