Setting Up Advanced Status Labels

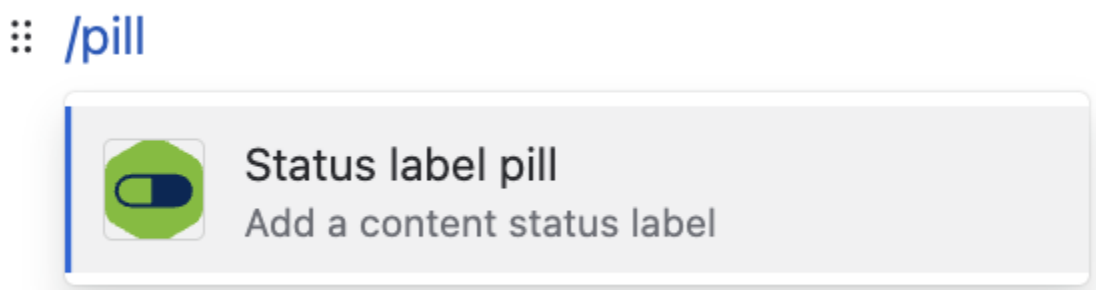

Getting Started Advanced Status Labels · https://izymes.com/docs/setting-up-advanced-status-labels/

When Advanced Status Labels for Confluence is installed in your workspace, you will see there are two stock categories (Status & Priority) already created along with 3 values for those categories.

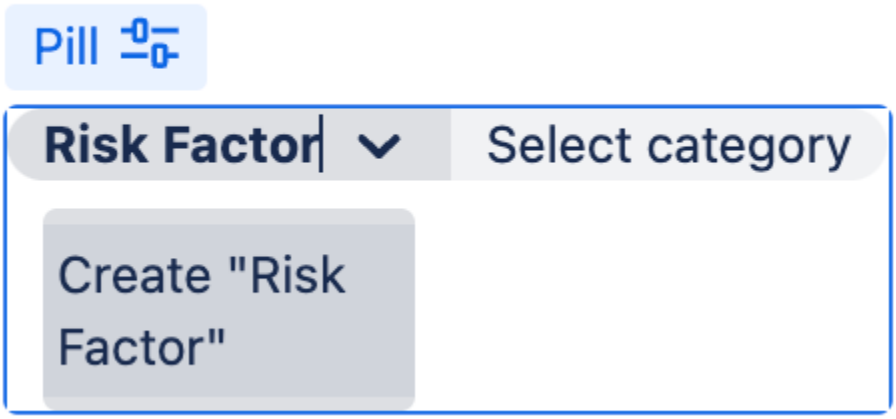

Creating your own category and values is easy. Simply follow these steps

1. Create a new blank page in Confluence

2. On the page type /pill

3. Click on the category dropdown and type out the name for your new category - then press ‘enter’ on keyboard to save.

4. Next you can create the values for the new category - click the “Create option” dropdown and type the first value. Then select a colour from the colour panel. Click enter to save

Then repeat step 4 to create another value. You can create as many different values for the category as you need.
